

UNICORN project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement No 101180172.

UNICORN joins the CMINE Responder Technology Cluster

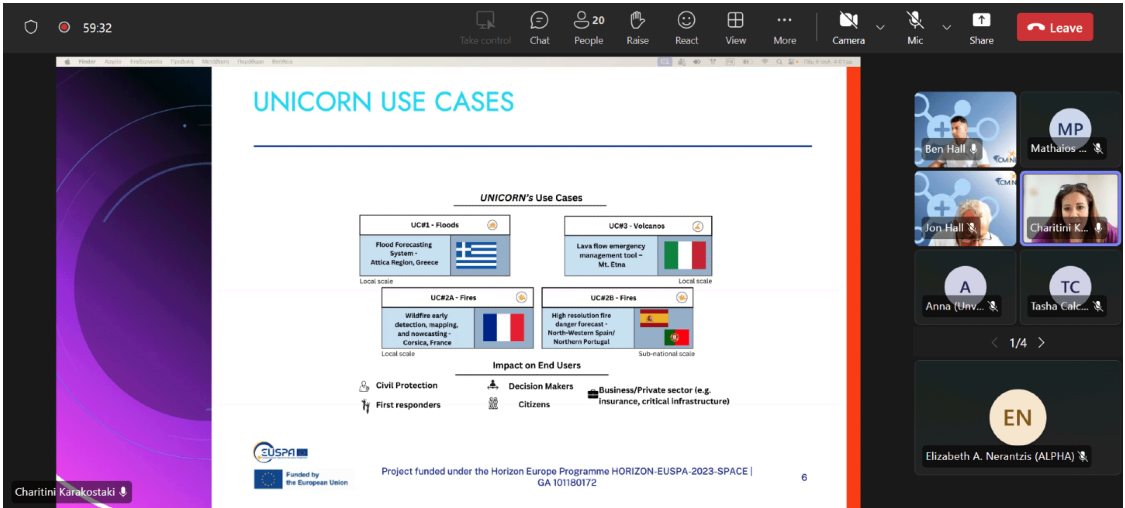

We are pleased to share an important milestone for the **UNICORN Project**.

Last Thursday, UNICORN was officially welcomed into the **CMINE Responder Technology Cluster (RTC)** during the latest Coordinators Meeting. The project was represented by **NOA/Beyond Centre** and **ALHPA**, on behalf of the UNICORN consortium.

During the meeting, **Charitini Karakostaki** (NOA/Beyond Centre, Project Coordinator) introduced the project, presenting its overall vision, key objectives, use cases and core activities. The session also provided an opportunity to exchange ideas with fellow **Horizon Europe** projects and explore common challenges and opportunities. The discussion highlighted several areas for future collaboration, including:

- strengthening cooperation with other Horizon Europe initiatives;
- contributing to joint cluster activities and dissemination actions;
- fostering new synergies to accelerate innovation for civil protection and first responders.

Joining the CMINE Responder Technology Cluster represents an important step for UNICORN, reinforcing the project's commitment to collaboration, knowledge sharing and the development of innovative solutions that enhance the capabilities of emergency responders across Europe.

We look forward to working closely with the RTC community and contributing to a stronger, more connected innovation ecosystem for civil protection.

Stay tuned for more updates on UNICORN's activities and upcoming collaborations.

Consortium partners: SIS 2B - Service d'Incendie et de Secours de la Haute-Corse | EDGE in Earth Observation Sciences | Riscognition | | ALPHA Consult | BEYOND Centre IAASARS/ NOA | Mitiga Solutions | Fondazione LINKS – Leading Innovation & Knowledge for Society | EUSPA - EU Agency for the Space Programme
